DETAILED ACTION

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

Page 3, line 14, change "ambeient" to --ambient--.

Appropriate correction is required.

Claim Objections

Claim 20 is objected to because of the following informalities: Claim 20 depends from itself. Appropriate correction is required.

Claim Rejections - 35 USC § 102

Art Unit: 3749

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 8, 10-12, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by **O'Neil (4,739,928)**. O'Neil discloses an evaporative device including a container (12) for holding a liquid and having an opening, a housing (10), a porous wick (16) extending through the opening such that a portion of the wick contacts the liquid held in the container and a portion of the wick is exposed (SEE Figure's 1, 5, 6) to the ambient environment, wherein the wick transfers the liquid from the container, a capillary member (22) is porous (ie: having capillary channels) and has a bottom plate-like structure which communicates with a portion of the wick which extends outside the container, the capillary member inherently draws liquid from the wick and disperses it to ambient air and furthermore is removable/detachable. A cover (24) encases a portion of the wick which extends outside the container (12) wherein all of the structures are made of polyethylene (SEE column 3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over **O'Neil (4,739,928)**. **O'Neil** discloses the applicants primary inventive concept including a container for holding liquid, a porous wick extending from the container, and a capillary member having a surface in communication with a portion of the wick, **O'Neil** however, does not particularly teach that the capillary member (plate) is substantially winged shaped. It would have been an obvious matter of design choice to modify the capillary member of **O'Neil** by having a wing shape extending from the wick , since the applicant has not disclosed that having a wing shape solves any stated problem or is for any particular purpose and it appears that the flat porous capillary member would perform equally well with a capillary plate of various shapes and sizes.

Allowable Subject Matter

Claims 5, 7, 9 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
